CONNECTING THE OTT, OVP AND PAYMENTS WORLDS WITH INDUSTRY-LEADING FEATURES.

OUR ADVANTAGE

OUR EXPERIENCE AND SUPPORT

With 10+ years experience in streaming media / OTT platforms, we understand the complexities of managing and supporting live and on-demand monetization. Our knowledge and experience is industry-leading, supporting 7000+ events live streaming events in 2019, we work with the largest global online rights, platforms and content owners in the world. Your teams and end-users receive a tailored and unmatched quality support before, during and after your event - in multiple languages, 24/7/365.

ADDRESS COSTS AND COMPLEXITY

Save months of development, staff resources and operation costs on support, billing, infrastructure and software maintenances. Our streamlined development process enables to address the costs and technology challenges to accelerate the launch and monetization of video services, configure and manage applications for multiple platforms, all in one place.

AUTONOMOUS BUSINESS OWNERSHIP

Reach audiences directly and start relationships with viewers. No middlemen, you own the data AND all revenue goes directly to you. Distribute content to the platforms of your choice. Full creative, and monetary control.

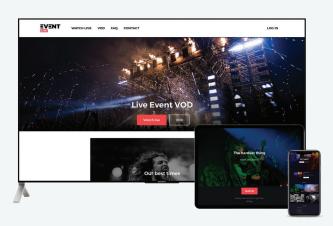

HIGHER SECURITY FOR IDENTITY AND PAYMENTS TRANSACTIONS

GDPR and PCI compliant - InPlayer is fully certified and committed to maintain all clients data and payments fully compliant, achieving and upholding ongoing compliances. With a range of DRM options ranging from AES encryption to enterprise grade PlayReady, we are protecting your content with the highest security standards.

GLOBAL CURRENCY AND PAYMENT PROCESSORS SUPPORT

Start selling anywhere in the world in multiple currencies. InPlayer is connecting every payment method into one centralised system and supports almost all of the possible payments processors, including China.

BUILT TO SCALE YOUR VIDEO BUSINESS

Whether you're just starting out with video monetization or building your business around it, our platform lets you scale as you grow with zero-fee entry level. Live stream your event, launch your portal with video PPV or subscription service and get an immediate ROI at no starting costs using market-leading subscription and pay-per-view functionalities.

AGILITY AND FLEXIBILITY TO FIT YOUR NEEDS

InPlayer tailors the most cost-effective and flexible monetization strategy to boost your business and revenues. We adapt to your brand requirements and provide you with a white-label platform to enhance your customers' loyalty.

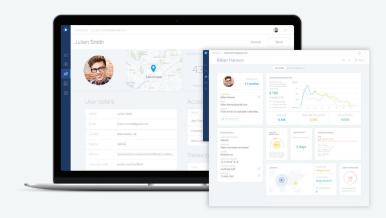

PAYMENTS AND CHURN MANAGEMENT SERVICES

Notification emails when a subscriber is renewing a subscription. Detection of churn profiles with smart data segmentation by subscription cancellations and/or by inactive subscribers (content access activity) in a specific period of time. Smart credit card management detecting and updating automatically any interruption of services or outdated credit cards.

MARKETPLACES

Connectivity with Marketplaces are wherever your video content can live amongst other content. A marketplace could be the AWS or Accedo One Marketplace where your OTT channel lives. You'll want a video monetization infrastructure that is partnering with leading marketplaces and can easily deliver your video to every marketplace quickly and efficiently.

MANAGE YOUR ASSETS

All your video assets are under your control on your own branded site and apps. Organize, distribute, promote and monetize each asset or package the way you wish. Synchronize and syndicate the distribution and monetization of multiple video assets to multiple destinations from a single centralized dashboard.

MAKE YOUR OWN SMART BUSINESS DECISIONS

As your audience evolves, change monetization models, add new offerings, create a new app with a flexible monetization platform. Control your assets with cross-platform functionality. Get real-time integrated analytics, engagement data and purchase predictions to build segmented profiles, more easily qualify and convert leads, and allow for more effective sales interactions.
